

## Bijou Area Erosion Control Project - Phase 1

<b>Project Number</b>	01.01.01.0019		
<b>Action Priority</b>	Reduce Stormwater Pollution From: Roads and Highways, Forest Roads, Public and Private Parcels		
<b>Implementers</b>	City of South Lake Tahoe		
<b>Supporting Agencies</b>	Unknown or unspecified		
<b>Primary Contact</b>	Stan Hill (shill@cityofslt.us)		
<b>Stage</b>	Completed	<b>Duration</b>	? - 2014
<b>Total Project Cost</b>	\$17,503,985	<b>Funding Request</b>	\$0

### Stormwater Management Program ➤ Reduce Stormwater Pollution From: Roads and Highways, Forest Roads, Public and Private Parcels

The Bijou Area Erosion Control Project - Phase 1 will treat stormwater runoff from the Bijou commercial area, adjacent to Lake Tahoe. The Bijou Commercial Core is 47 acres of nearly 100% impervious area, including US Highway 50, commercial properties, and City roads. Project construction includes: (1) Construction of a regional treatment system for Commercial Core runoff which will be pumped through an underground force main to infiltration basins in the upper watershed; and (2) Replacement of the Bijou Creek storm drain system that conveys storm water runoff from the 1,300-acre Bijou Creek watershed, through the Commercial Core, to Lake Tahoe.

#### Targeted Performance Measures

- Miles of Roads Decommissioned or Retrofitted

#### Threshold Categories

- Scenic Resources
- Soil Conservation
- Vegetation Preservation
- Water Quality

#### Location

#### Targeted Funding

■ Secured Funding: Unknown or Unassigned, \$17,503,985
