

Osgood Basin Expansion

Project Number	01.01.01.0156		
Action Priority	Reduce Stormwater Pollution From: Roads and Highways, Forest Roads, Public and Private Parcels		
Implementers	City of South Lake Tahoe		
Supporting Agencies	Unknown		
Primary Contact	Stephen Anderjack (sanderjack@cityofslt.us)		
Stage	Deferred	Duration	2019 - ongoing
Total Project Cost	\$2,000,000	Funding Request	Unknown

Stormwater Management Program > Reduce Stormwater Pollution From: Roads and Highways, Forest Roads, Public and Private Parcels

Retrofit of the existing undersized Osgood basin to reduce fine sediment particles and nutrients in a high-priority, directly-connected catchment that discharges directly into the Ski Run Marina. Expansion of the basin to the east would require a higher berm, and proportionally larger footprint to overcome the challenges with the high groundwater table onsite. Alternative options may include a bypass to the Wildwood basins that would provide additional treatment once the the capacity of the currently undersized Osgood basin is exceeded. This project has been incorporated in the Upper Bijou Park Creek Project (EIP #01.01.01.0184).
