

Griff Creek Stream Habitat Restoration

Project Number	01.02.01.0026	Duration	2010 - 2017
Action Priority	Restore Priority Meadows, Wetlands, and Lake Tahoe Tributaries	Funding Request	\$0
Implementers	Placer County, CA		
Supporting Agencies	Unknown or unspecified		
Primary Contact	Kansas McGahan (kmcgahan@placer.ca.gov)		
Stage	Completed		
Total Project Cost	\$195,278		

Watershed Restoration Program ➤ Restore Priority Meadows, Wetlands, and Lake Tahoe Tributaries

Griff Creek is located within the Griff Creek watershed in Kings Beach along the north shore of Lake Tahoe. Due to development in the urbanized area of Kings Beach, the once braided stream channel system with natural flood control zones has been forced into a single channel that has resulted in significant bank erosion and incised channels. The purpose of the project is to improve the water quality in the Griff Creek watershed within the residential area of Kings Beach by preventing further stream degradation, installing water quality enhancement features, and restoring stream environmental zones where feasible.

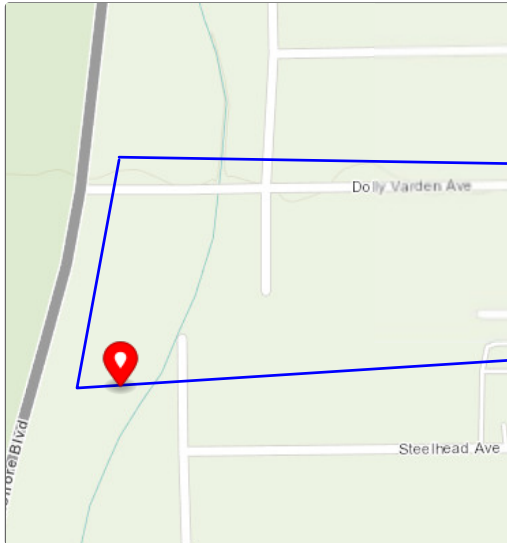

Targeted Performance Measures

- Acres of SEZ Restored or Enhanced
- Linear Feet of Stream Channel Restored or Enhanced

Threshold Categories

- Fisheries
- Vegetation Preservation
- Soil Conservation
- Water Quality

Location

Construction completed during summer 2016

Targeted Funding

■ Secured Funding: Unknown or Unassigned, \$195,278
