

Tahoe Paradise Park Upper Truckee River Stabilization and Restoration Project

Project Number	01.02.01.0086		
Action Priority	Restore Priority Meadows, Wetlands, and Lake Tahoe Tributaries		
Implementers	U.S. Forest Service - Lake Tahoe Basin Management Unit		
Supporting Agencies	Unknown		
Primary Contact	Brian Garrett (brian.garrett@usda.gov)		
Stage	Planning/Design	Duration	2018 - 2021
Total Project Cost	\$1,300,000	Funding Request	Unknown

Watershed Restoration Program ➤ Restore Priority Meadows, Wetlands, and Lake Tahoe Tributaries

This project will restore the ecological function of the impaired reach of the Upper Truckee River lying between the Washoe Meadows golf course and the Tahoe Pines public access. In this reach, streambank erosion impacts the UTR and has destroyed sections of established streamside trails on the east bank upstream of and alongside Lake Baron (which is infested with invasive fish and plant species), and on Forest Service land on the west bank. Restoration activities include re-contouring the vertical-cut streambanks & stabilizing by strategic placement of woody debris and boulders, relocation of streamside trails & creation of low-impact public access, and removal of AIS from Lake Baron.

No Key Photo provided for this Project

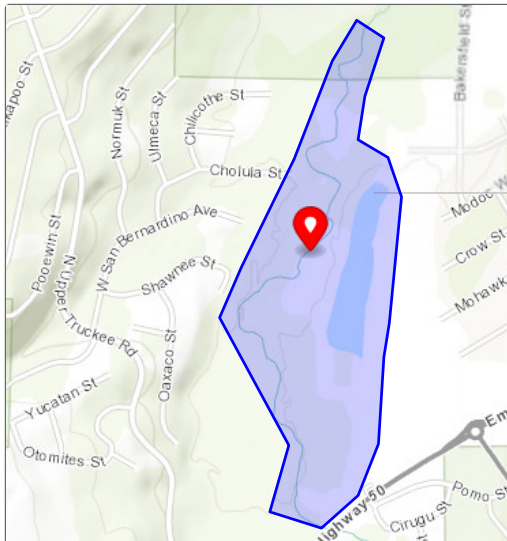

Targeted Performance Measures

- Acres of Habitat Restored or Enhanced
- Acres of SEZ Restored or Enhanced
- Acres Treated for Invasive Species
- Linear Feet of Stream Channel Restored or Enhanced

Threshold Categories

- Fisheries
- Recreation
- Soil Conservation
- Water Quality

Location

Targeted Funding
