

Edgewood Aquatic Invasive Plant Control

Project Number	01.03.01.0029		
Action Priority	Prevent, Control, or Eradicate Aquatic Invasive Species		
Implementers	Tahoe Resource Conservation District		
Supporting Agencies	Nevada Tahoe Resource Team – Nevada Division of State Lands		
Primary Contact	Mollie Hurt (mhurt@tahoercd.org)		
Stage	Planning/Design	Duration	2019 - 2026
Total Project Cost	\$500,000	Funding Request	\$400,000

Aquatic Invasive Species Program > Prevent, Control, or Eradicate Aquatic Invasive Species

Eurasian watermilfoil and curlyleaf pondweed were detected in Edgewood Creek and in ponds on Edgewood Golf Course during surveys conducted for the Aquatic Plant Monitoring Plan Project in 2018. Due to the extent of the infestation, a comprehensive survey of Edgewood Creek, ponds, and Friday Station reservoir was conducted in September 2020. During the planning phase, plant fragment control is proposed to limit the spread of this infestation and prevent it from entering Lake Tahoe. The size and complex nature of this series of infestations requires close coordination and planning with Edgewood Companies' staff, planned restoration projects, and a secured funding source.

No Key Photo provided for this Project

Targeted Performance Measures

- Acres of Invasive Species Inventoried
- Acres Treated for Invasive Species

Threshold Categories

- Fisheries
- Water Quality

Location

Targeted Funding

- Secured Funding: Lake Tahoe License Plate Prog... (NDSL), \$6,500
- Targeted Funding: Lake Tahoe Restoration Act (USFWS), \$400,000
- No Funding Source Identified
