

## Pope Marsh Aquatic Invasive Plant Control Project

<b>Project Number</b>	01.03.01.0050		
<b>Action Priority</b>	Prevent, Control, or Eradicate Aquatic Invasive Species		
<b>Implementers</b>	Tahoe Resource Conservation District		
<b>Supporting Agencies</b>	Tahoe Fund, Tahoe Regional Planning Agency, U.S. Forest Service - Lake Tahoe Basin Management Unit		
<b>Primary Contact</b>	Mollie Hurt (mhurt@tahoercd.org)		
<b>Stage</b>	Implementation	<b>Duration</b>	2025 - 2029
<b>Total Project Cost</b>	\$800,000	<b>Funding Request</b>	\$100,000

### Aquatic Invasive Species Program > Prevent, Control, or Eradicate Aquatic Invasive Species

The purpose of the project is to remove aquatic invasive plants (AIP) in Pope Marsh, and exclude plant fragments growing in Lake Tallac from flowing into and infesting the marsh and subsequently, Lake Tahoe. Pope Marsh is identified in the Lake Tahoe Region Aquatic Invasive Species Action Agenda 2021-2030 as a priority project. A survey conducted in July 2023 by Tahoe RCD's contracted divers detected Eurasian watermilfoil (*Myriophyllum spicatum*) growing at various densities within a 1.8-acre area. In 2025, survey and hand removal of AIP was conducted by contracted divers and a metal screen was installed on top of the weir separating Pope Marsh from Lake Tallac to prevent further infestation.

#### Targeted Performance Measures

- Acres of Invasive Species Inventoried
- Acres Treated for Invasive Species

#### Threshold Categories

- Fisheries
- Recreation
- Scenic Resources
- Water Quality

#### Location

Surveyors from Tahoe Resource Conservation District and Marine Taxonomic Services identifying aquatic invasive plants in Pope Marsh, South Lake Tahoe, CA, July 2025.

#### Targeted Funding

- Secured Funding: Lake Tahoe Restoration Act (TRPA), \$272,000
- Secured Funding: Lake Tahoe Restoratio... (USFS - LTBMU), \$200,000
- Secured Funding: Tahoe Fund (Tahoe Fund), \$3,500
- Targeted Funding: SB630 Funds (CTC), \$100,000
- No Funding Source Identified

## Photos

### Before

Marine Taxonomic Services staff removing Eurasian watermilfoil from Pope Marsh, South Lake Tahoe, CA, August 2024.

### During

Metal mesh screen secured to weir separates Lake Tallac (Tahoe Keys) from Pope Marsh to prevent aquatic invasive plants from entering Pope Marsh and Lake Tahoe, South Lake Tahoe, CA, December 2025.
