

South Shore Offshore Aquatic Invasive Plant Planning and Control

Project Number	01.03.01.0051		
Action Priority	Prevent, Control, or Eradicate Aquatic Invasive Species		
Implementers	Tahoe Resource Conservation District		
Supporting Agencies	Tahoe Regional Planning Agency		
Primary Contact	Mollie Hurt (mhurt@tahoercd.org)		
Stage	Implementation	Duration	2025 - 2030
Total Project Cost	\$2,000,000	Funding Request	\$0

Aquatic Invasive Species Program > Prevent, Control, or Eradicate Aquatic Invasive Species

Enhanced aquatic invasive plant monitoring has revealed sparse areas of plant infestations between previously defined project areas. The South Shore Offshore Aquatic Invasive Plant Planning and Control project implements a new strategy to evaluate, plan, and implement control treatments in aquatic invasive plant-infested areas over a larger landscape vs. individual, specific areas. Work commenced in 2025 in the following unit locations: Taylor-Tallac offshore, Camp Richardson, Edgewood 1, Edgewood 2, and Nevada Beach.

No Key Photo provided for this Project

Targeted Performance Measures

- Acres of Invasive Species Inventoried
- Acres Treated for Invasive Species

Threshold Categories

- Fisheries
- Recreation
- Scenic Resources
- Water Quality

Location

Targeted Funding

- Secured Funding: Lake Tahoe Restoration Act (TRPA), \$320,580
- No Funding Source Identified
