

Elk Point and Round Hill Rock Cribs Aquatic Invasive Plant Control

Project Number	01.03.01.0052		
Action Priority	Prevent, Control, or Eradicate Aquatic Invasive Species		
Implementers	Tahoe Resource Conservation District		
Supporting Agencies	Tahoe Regional Planning Agency		
Primary Contact	Mollie Hurt (mhurt@tahoercd.org)		
Stage	Planning/Design	Duration	2025 - 2030
Total Project Cost	\$150,000	Funding Request	\$100,000

Aquatic Invasive Species Program > Prevent, Control, or Eradicate Aquatic Invasive Species

From May to July 2025, divers conducting surveillance work north of Nevada Beach detected thousands of aquatic invasive plant fragments floating on the water surface and in the water column. Thousands of these fragments settled and rooted offshore in numbers and distribution far exceeding previous observations in this location. This discovery spurred a rapid response, and divers spent several days pulling the rooted plants and removing fragments. This project proposes to conduct site assessments and plant removal dive visits at this location and sites north of Elk Point in 2026, to ensure that no aquatic invasive plants are infesting the area.

No Key Photo provided for this Project

Targeted Performance Measures

- Acres of Invasive Species Inventoried
- Acres Treated for Invasive Species

Threshold Categories

- Fisheries
- Recreation
- Scenic Resources
- Water Quality

Location

Targeted Funding

- Secured Funding: Lake Tahoe Restoration Act (TRPA), \$50,000
- Targeted Funding: Nevada Division of State Land... (NDSL), \$100,000
