

## Glenbrook Fuels Reduction Project

<b>Project Number</b>	02.01.01.0094
<b>Action Priority</b>	Reduce Hazardous Fuels
<b>Implementers</b>	Tahoe Douglas Fire Protection District
<b>Supporting Agencies</b>	U.S. Forest Service - Lake Tahoe Basin Management Unit
<b>Primary Contact</b>	Keegan Schafer (kschafer@tahoe-fire.com)

<b>Stage</b>	Completed	<b>Duration</b>	2015 - 2020
<b>Total Project Cost</b>	\$300,000	<b>Funding Request</b>	\$0

### Community Wildfire Protection Program > Reduce Hazardous Fuels

The Glenbrook Fuels Reduction Project is a forest fuels reduction project that will create a shaded fuel break on between 161 and 200 acres of overstocked forest within the defense zone of the wildland urban interface in the region. The proposed project is designed to modify fire behavior and reduce flame lengths to 4 feet during 90th percentile fire weather. This type of forest thinning project will enable firefighters to engage in structure protection in the event of a wildland fire.

#### Targeted Performance Measures

- Acres of Forest Fuels Reduction Treatment

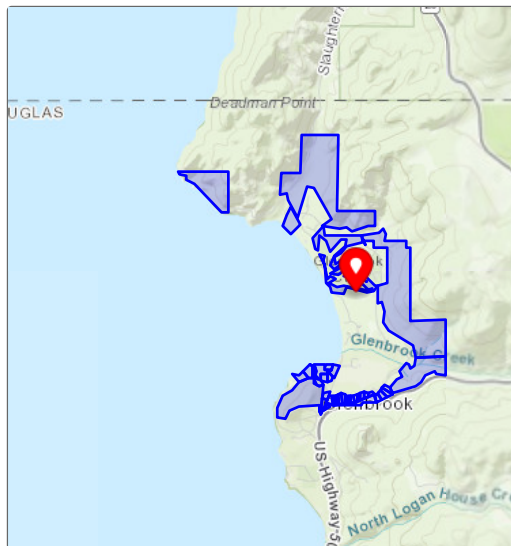

#### Threshold Categories

- Vegetation Preservation

Hand Piles in Glenbrook

#### Location

#### Targeted Funding

■ Secured Funding: U.S. Forest Service (USFS - LTBMU), \$300,000
