 Stage
 Implementation
 Duration
 2017 - 2024

 Total Project Cost
 \$6,814,500
 Funding Request
 \$0

Community Wildfire Protection Program > Reduce Hazardous Fuels

Water Quality

This project represents a regional approach with focus areas determined through partnership with TFFT. 1,200-1,800 acres of fuels treatment will be performed and prioritized from 3,000 acre focus areas. The initial phase of the \$6.8 million BLM funded project represents the early planning, monitoring and assessment and prioritization efforts associated with the project. Field planning, permitting and implementation of specific areas may be entered and tracked as individual projects.

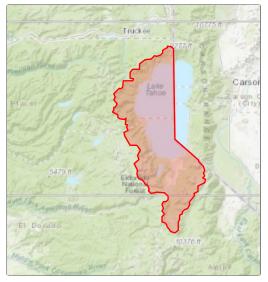

Targeted Performance Measures

• Acres of Forest Fuels Reduction Treatment

Threshold Categories

- Vegetation Preservation
- Wildlife
