

Sugar Pine SNPLMA Round 16 Hazardous Fuel Reduction Phase 2

Project Number	02.01.01.0113		
Action Priority	Reduce Hazardous Fuels		
Implementers	California Department of Parks and Recreation		
Supporting Agencies	California Tahoe Conservancy		
Primary Contact	Ryan Howard (Ryan.Howard@parks.ca.gov)		
Stage	Completed	Duration	2020 - 2023
Total Project Cost	\$487,500	Funding Request	\$0

Community Wildfire Protection Program > Reduce Hazardous Fuels

The SNPLMA Round 16 Phase 2 project will thin forest stands and reduce fire fuels on 150 acres within a 267-acre area of Sugar Pine Point State Park, continuing where Phase 1 left off. The project is designed to reduce tree densities and surface fuel loading to modify potential fire behavior and reduce the threat of high intensity wildfire. The project will also restore native forest composition, structure and function. Forest thinning and fuel reduction treatments will include: hand crew thinning, chipping, pile burning and understory burning.

Pile Burning

Targeted Performance Measures

- Acres of Forest Fuels Reduction Treatment

Threshold Categories

- Vegetation Preservation

Location

Targeted Funding

<p>■ Secured Funding: California Tahoe Conservancy (CTC), \$487,500</p>
