

# Tranquility Estates Fuels Treatment and Stream Restoration

<b>Project Number</b>	02.01.01.0168		
<b>Action Priority</b>	Reduce Hazardous Fuels		
<b>Implementers</b>	Nevada Tahoe Conservation District		
<b>Supporting Agencies</b>	Unknown		
<b>Primary Contact</b>	Domi Fellers (dfellers@ntcd.org)		
<b>Stage</b>	Planning/Design	<b>Duration</b>	2025 - 2029
<b>Total Project Cost</b>	\$857,199	<b>Funding Request</b>	Unknown

## Community Wildfire Protection Program > Reduce Hazardous Fuels

Fuels reduction and stream restoration of up to 100 acres of fuel reduction work on a 200-acre private parcel to reduce wildfire risk, restore functions on McFaul Creek, and remove invasive weeds. Fuel treatments would include thinning of overstory trees, slash piling and burning. Understory brush would be cut, piled and burned, masticated, or chipped. Stream restoration would include performing low-impact process-based restoration water quality improvements while simultaneously performing fuels reduction within the SEZ.
