NV Energy Resilience Corridor Project-State and Private

Project Number	02.01.02.0020
Action Priority	Implement Defensible Space on Public and Private Parcels and Utility Corridors
Implementers	Nevada Energy
Supporting Agencies	Unknown
Primary Contact	Nanette Hansel (nanette.hansel@ascentenvironmental.com)

Stage	Implementation	**Duration**	2022 - 2032
Total Project Cost	$11,000,000	**Funding Request**	Unknown

Community Wildfire Protection Program › Implement Defensible Space on Public and Private Parcels and Utility Corridors

This project focuses on fuels work on non-federal lands with the goal of creating resilient corridors along NV Energy's electrical lines on all lands. This project also includes electrical system upgrades across all lands, including federal, in the Tahoe Basin. Together, the fuel management work and electrical infrastructure upgrades minimize wildfire risk as called for in NV Energy's Natural Disaster Prevention Plan (NDPP). This project is linked to EIP Project # 02.01.02.0016 which focuses on fuels management along NV Energy's electrical lines on federal lands managed by the US Forest Service-Lake Tahoe Basin Management Unit.

NLTFPD fuels crews conducting resilience corridors treatments on state lands along Incline 4100 near Sand Harbor

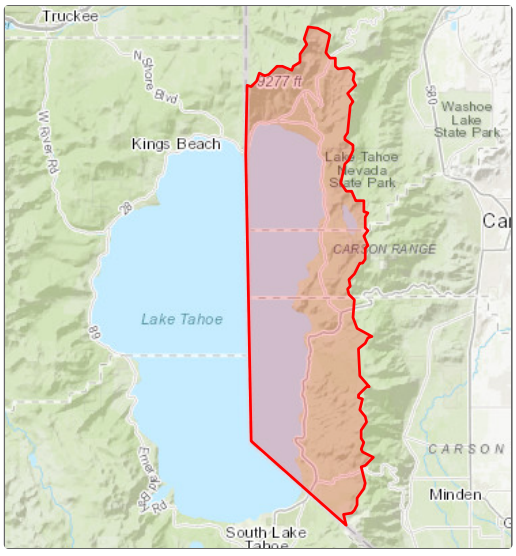
Targeted Performance Measures

- Acres of Forest Fuels Reduction Treatment

Threshold Categories

- Vegetation Preservation
- Wildlife

Location



Targeted Funding
