

Glenbrook - Yerington Area Tree Thinning Project

Project Number	02.01.02.0026		
Action Priority	Implement Defensible Space on Public and Private Parcels and Utility Corridors		
Implementers	Glenbrook Homeowners Association		
Supporting Agencies	Private		
Primary Contact	Sydney Morrow (smorrow@accessexploration.com)		

Stage	Completed	Duration	2025 - 2025
Total Project Cost	\$337,500	Funding Request	\$0

Community Wildfire Protection Program ➤ Implement Defensible Space on Public and Private Parcels and Utility Corridors

This defensible space enhancement project with the Tahoe Douglas Fire Protection District thinned trees on 42 acres of land owned by 40 different individuals. Goal was to restore parcel forests to a healthier density. At the conclusion of project, defensible space around homes was expanded. Lean, clean, green zones are have been enhanced among closely spaced cottage and single family homes. This project aligns with the Lake Tahoe - Community Wildfire Protection Plan and reduces wildfire risk in a designated Highest Priority Tier 1 Zone.

Targeted Performance Measures

- Acres of Forest Fuels Reduction Treatment

Threshold Categories

- Vegetation Preservation

Example of Dead Trees Near Home Structures

Location

Targeted Funding

■ Secured Funding: Private Property Owners (Private), \$337,500
