

Prescribed Fire Treatment at Airport for 2020-2021 CCC Treatment of Trees less than 14" dbh

Project Number	02.02.02.0012		
Action Priority	Implement Prescribed Fire		
Implementers	City of South Lake Tahoe		
Supporting Agencies			
Primary Contact	John Dickinson (jdickinson@cityofslt.us)		
Stage	Completed	Duration	2021 - 2023
Total Project Cost	\$58,000	Funding Request	\$58,000

Forest Restoration Program > Implement Prescribed Fire

California Conservation Corps (CCC) were hired by the Airport to perform forest health hazardous fuels reduction on trees located outside of the Stream Environment Zone. Treatment occurred in 2020 and 2021 concluding in November 2021 (South Lake Tahoe Airport Improvement Project). All trees were hand cut and stacked into burn piles for future prescribed burn after wood has cured. El Dorado AQMD permits must be secured prior to any ignition. Per TRPA MOU MM a Qualified Exemption is required for this project. CCC will be hired to perform prescribed burns on behalf of the airport.

Less than 14 " dbh trees for prescriptive burning on Airport Property

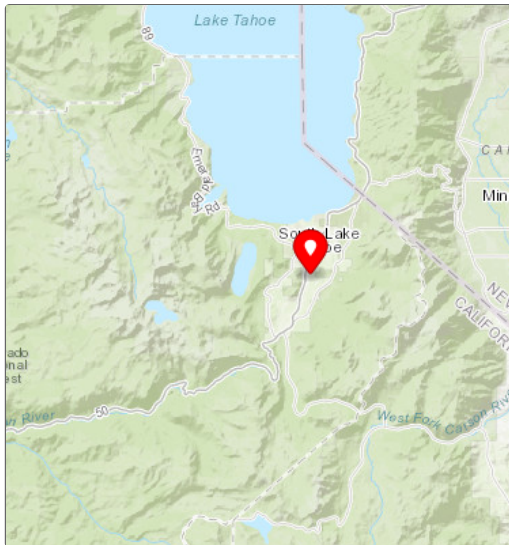

Targeted Performance Measures

- Acres of Forest Fuels Reduction Treatment

Threshold Categories

- Vegetation Preservation

Location

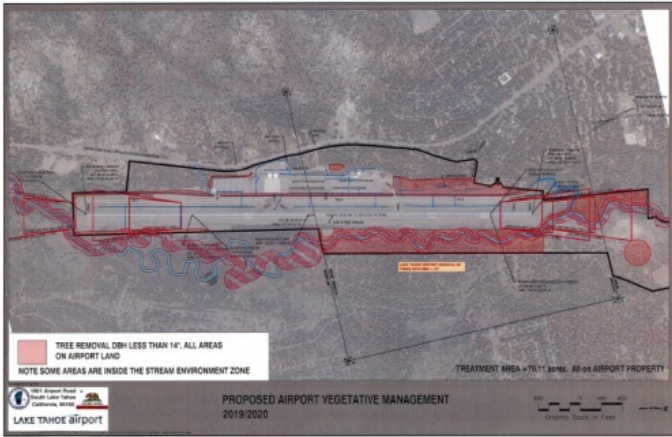

Targeted Funding

<p>■ Targeted Funding: City of South Lake Tahoe Gene... (CSLT), \$58,000</p>
