

Shift from Nonnatives to Native Fish Species

Project Number	02.02.03.0028	Duration	2022 - ongoing
Action Priority	Restore and Protect Native Fish and Wildlife	Funding Request	\$0
Implementers	Washoe Tribe of Nevada and California, U.S. Fish and Wildlife Service		
Supporting Agencies	U.S. Fish and Wildlife Service		
Primary Contact	Kristina Burnette (kristina.burnette@washoetribe.us)		
Stage	Planning/Design		
Total Project Cost	\$251,241		

Forest Restoration Program ➤ Restore and Protect Native Fish and Wildlife

WEPD Environmental Scientist and Environmental Manager will meet with agencies that are in charge with managing fisheries to understand recovery efforts and current status of a species (ex. Tahoe Basin Recovery Implementation Team (TBRIT)). WEPD will meet with the Washoe Environmental Advisors regular to gather updates on recovery and get further input on Washoe priorities. Seasonal field crews will monitor native and nonnative fish, assist in controlling nonnative fish and AIS, and participate in reintroductions to streams and outlets of culture significance to the Washoe Tribe.

Targeted Performance Measures

- Acres of Invasive Species Inventoried

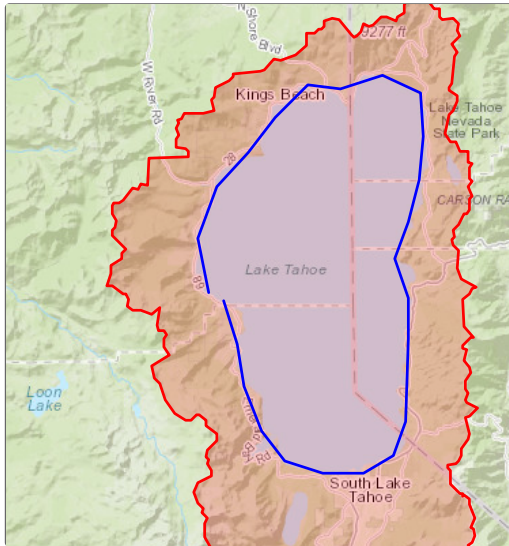

Threshold Categories

- Fisheries
- Water Quality
