Sustainable Recreation Program > Improve Public Recreation Facilities

The project includes the replacement and upgrade of Diver's Cove and the eastern portion of picnic area walkways to ADA Accessibility standards. In addition, the existing scenic overlooks will be replaced with new overlooks with code compliant railings to funnel access through a defined path which provide ADA compliant access and eliminate the use of social trails. The overlooks will have decking and stairs constructed of open grate so that they are fully permeable and allow the infiltration of water beneath the structures.
