Transportation Program > Build and Enhance Transit Systems

The Tahoe Basin has a need for improved, real-time information about roadway conditions including current traffic levels, congestion, incidents, weather conditions, maintenance and construction activities, and tire/chain requirements. The goal of this functional area is to provide travelers with timely, accurate and easily accessible information about travel delays and conditions. This project reduces congestion and traveler delays, increases the efficiency of the transportation system, and minimizes impacts of transportation on the environment. This project is ITS Plan - RI-03.

No Key Photo provided for this Project

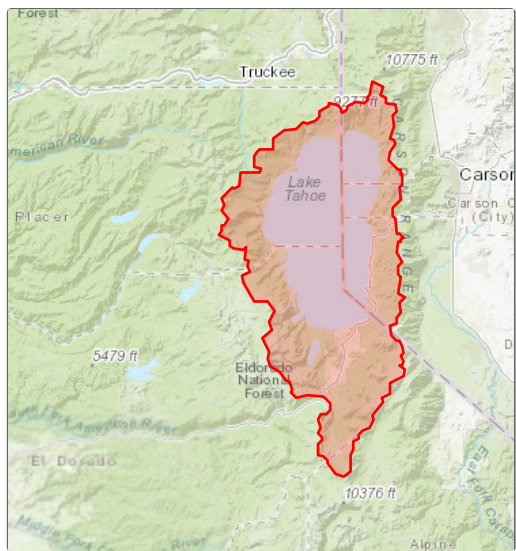

Targeted Performance Measures

- Pounds of Air Pollutants Removed or Avoided by Project
- Tons of Greenhouse Gases Reduced

Threshold Categories

- Air Quality

Location

Targeted Funding

| | |
|---|---|
| ■ | Targeted Funding: U.S. Federal Highway Administr... (FHWA), \$1,000,000 |
