

Develop Nearshore Indicators and Standards Plus Monitoring Plan

Project Number 04.01.01.0013
Action Priority Conduct Applied Scientific Research
Implementers U.S. Forest Service - Pacific Southwest Research Station
Supporting Agencies Unknown or unspecified
Primary Contact Pat Manley (pmanley@fs.fed.us)

Stage Completed
Duration 2010 - 2013
Total Project Cost \$180,000
Funding Request \$0

Science Program > Conduct Applied Scientific Research

Lake Tahoe Nearshore Evaluation and Monitoring Framework Researchers from the Desert Research Institute, the University of Nevada Reno, and the University of California, Davis conducted a synthesis review of nearshore information to assist in the development of a monitoring and evaluation plan to track changes in nearshore conditions. Ultimately, the findings and recommendations of this project are expected to support several agency statutory and programmatic needs by: 1) providing baseline information to support assessment of relevant state and TRPA standards; 2) supporting the development of products for the Tahoe Monitoring and Evaluation Program; 3) tracking the effectiveness of the Tahoe TMDL Program and other EIP efforts related to nearshore condition; and 4) contributing to detection and management of aquatic invasive species in the nearshore.

Targeted Performance Measures

No Expected Accomplishments provided

Threshold Categories

- Fisheries
- Recreation
- Water Quality

Nearshore Evaluation and Monitoring Framework
