

P019: Developing Fuels Treatments for Balancing Fuel Reduction, Soil Exposure, and Potential for Erosion in the Tahoe Basin

Project Number	04.01.01.0105		
Action Priority	Conduct Applied Scientific Research		
Implementers	Humboldt State University		
Supporting Agencies	U.S. Forest Service - Pacific Southwest Research Station		
Primary Contact	Kat McIntyre (KMcIntyre@trpa.gov)		
Stage	Completed	Duration	2007 - 2010
Total Project Cost	\$276,915	Funding Request	\$0

Science Program > Conduct Applied Scientific Research

Determine optimal targets for reducing fire hazard while minimizing erosion rates by characterizing fuel loading and patchiness and forest floor moisture content at eight sites and then evaluating response of prescribed fire and mastication treatments to simulated overland flow.
