

Zooplankton Ecology of Lake Tahoe

Project Number	04.01.01.0173
Action Priority	Conduct Applied Scientific Research
Implementers	University of Nevada, Reno
Supporting Agencies	U.S. Geological Survey
Primary Contact	Robert Larsen (robert.larsen@resources.ca.gov)

Stage	Planning/Design	Duration	2022 - 2025
Total Project Cost	\$199,953	Funding Request	\$0

Science Program > Conduct Applied Scientific Research

The project team will fill key knowledge gaps by (1) quantifying the horizontal and vertical distribution of zooplankton across the spatial extent of Lake Tahoe, (2) determining the composition and amount of microzooplankton, and (3) quantifying the role of nearshore and offshore zooplankton communities on particle size distribution in their respective habitats. The data generated from this project will be made available regularly to our public, management, and scientific communities for evaluation so others can use the data and contribute to our understanding on how to better conserve Lake Tahoe.
