Stewardship Program > Utilize Innovative Technology

This project intends to provide the planning, design, prototyping, and evaluation of a single cloud-based open source or interface for pertinent transportation and traveler related information. This information will be used by TTD and TRPA, partners, commuters, and travelers within the Tahoe Basin and adjoining areas to provide integrated infrastructure to collect vehicle data and incorporate into a database for a variety of stakeholders. The system will provide a platform for future expansion, command, control, and configuration.
