

Tahoe Keys Tactical Green Infrastructure

Project Number	01.01.01.0197
Action Priority	Reduce Stormwater Pollution From: Roads and Highways, Forest Roads, Public and Privat Parcels
Implementers	Tahoe Resource Conservation District
Primary Contact	Andrea Buxton (abuxton@tahoercd.org)
Stage	Planning/Design
Duration	2021 - 2024

Stormwater Management Program > Reduce Stormwater Pollution From: Roads and Highways, Forest Roads, Public and Private Parcels

The project involves watershed planning, stakeholder outreach and implementation of innovative stormwater technologies that reduce TMDL pollutants in the Tahoe Keys community of South Lake Tahoe, California. By using a regional stormwater treatment approach with public/private partnerships, and by installing LID stormwater treatment and modular floating treatment wetlands, the project will improve water quality, while enhancing wildlife habitat, increasing climate change resiliency, reducing wildfire threat, improving bicycle and pedestrian connectivity, and helping to protect the existing investment in Aquatic Invasive Species control in the Tahoe Keys.

Key Accomplishments

Accomplishments to be provided upon completion of project

Threshold Categories

- Recreation
- Soil Conservation
- Wildlife
- Scenic Resources
- Water Quality

Location

Expenditures

No expenditures provided

Photos

Before

Possible location for Tactical Green Infrastructure (TGI) installation in the Tahoe Keys.

Approximately half of Tahoe Keys residential parcels do not have BMPs in 2020
